Course	College/University	Year	%age
B.Tech Hon. (CSE)	University of Engineering and Management	2018-2022	88.22
Intermediate/+2	Purwanchal Vidyamandir	2018	90
High School	Purwanchal Vidyamandir	2016	93.4

SCHOLASTIC ACHIEVEMENTS

- Academic Scholarship from University of Engineering and Management [2018-22]
- Secured 5 th rank in CSE batch [2018-19]
- Solved 500+ coding problems across Hackerrank , Codechef and Leetcode [2021-24]

WORK EXPERIENCE

- **QA Engineer | VectorShift.ai** [Oct'25-Present]
  - Designed and developed a scalable end-to-end **test automation framework** from scratch using **Playwright with TypeScript/JavaScript**, enabling efficient cross-browser testing.
  - Designed and implemented **AI-driven automation workflows in VectorShift** to validate chatbot interactions, API integrations, knowledge base accuracy, and dynamic data tables, improving end-to-end test coverage, reliability, and defect detection efficiency.
  - Managed and maintained the test automation pipeline using **TeamCity and GitHub Actions**, configuring **YAML-based workflows** to execute test suites, monitor performance, and generate detailed test reports.
- **Senior Analyst | Capgemini Technology Services India Limited** [Oct'22- April'24]
  - Conducted comprehensive **UI functional** and **API testing** using **Selenium** with **Java** for a complex insurance domain portal, ensuring system reliability and alignment with business requirements.
  - Automated 80% of API test cases using **Java + Rest Assured + TestNG**, reducing manual effort by 40% per sprint.
  - **Automated digital signature workflows** across multiple insurance forms, reducing manual verification time by 60% and improving form processing efficiency
  - Increased overall **automated test coverage by 70%**,with raising defects and tracking progress using **Jira , qTest**, contributing to faster and more reliable release cycles.
- **Senior Analyst Intern | Capgemini Technology Services India Limited** [Feb'22-April'22]
  - Worked as an Intern to develop Behavior-Driven Development (BDD) test scripts and testcases for Payback Website
  - Generated detailed test reports to moniter test progress and outcomes improving quality of Payback website
- **Java Developer Intern | Cognizant Technology Solutions** [May'21-Sept'21]
  - Assisted in the development and maintenance of Java-based applications using Core Java and OOP concepts covering database Connectivity (JDBC), Exception Handling, J-unit, Threading, Collections.

SKILLS & INTERESTS

- **Programming Languages**: Java, Python, C , HTML , CSS , Java Script , Typescript
- **Tools & Libraries**: Playwright , Selenium , Cucumber, RestAssured , Postman , Jira, SQL ,Git , TestNG
- **Interest** : UI Testing , API Testing , Backend Development

PROJECTS

- **Face Recognition Attendance System** [Jan'22-Apr'22]
  - Developed a Deep-Learning Model, capable of identifying people from video frames with high accuracy.
  - Designed frontend using Streamlit and HTML,CSS and utilized Python flask for backend.
- **Student Timetable Management System** [Sept'21-Nov'21]
  - Developed a full stack web-application for updating student timetable and records.
  - Created two seperate interface for admin and users for viewing ,uploading ,storing files and records.
